

FAST PATH TO LEARNING

We offer robust learning management solutions with the option to access our certification programs and over 700 individual courses covering 14 different learning categories. We offer LMS design, layout, communication, content management including integration, user management, social media integration, analytics, reporting and more!

Empower your organization with a seamless hosted learning management solution that allows you to create and engage your users with your own or 3rd party delivered content. Manage the learning path for individuals, teams or the entire organization using our cost effective, high performance hosted learning management solution. Our solution is configurable, affordable, cost efficient allowing for an effective, consistent learning delivery for your entire organization.

Learning Content

A fully functional LMS is only half of the equation to successful learning. Content is key and our LMS solutions contain features such as content authoring, allowing our customers to create their own content, we also have a robust library of digital content that can be seamlessly integrated into your LMS. We can also integrate external content from any provider across all industries. All of Orion's courses are internationally accredited, competency based and are geared towards adult learners.

Learning Management Solutions
